SUSTAINABILITY REPORT
(Indicators 2016-2018)

May, 31st 2019
A sustainability indicator is any economic, social, political, or biological element that provides information about certain aspects of the natural world, environmental policies or other related economic and social factors. A sustainability indicator system enables us to make strategic, environmental and social decisions and helps us to turn this information into action.

We use the tool Sustainablekeyindicators.com, based on the GRI (Global Report Initiative), the international guide more used for sustainable development and indicator guidelines.

The aim of this management is to evaluate sustainable behavior to provide us information in order to ascertain whether our organization has the ability to meet the established requirements, whether these be legal requirements or ones to which the Management or third parties must adhere (ISO 14001:2015 norms, Travelife System, ...)

The SON RAMON winery (founded 1649) lies in the municipality of Llubi, between the towns of Llubí and Muro.

As long ago as 1760, the estate was formed by 37 hectares of vineyards and an old Majorcan wine cellar, which is still conserved today. At the beginning of the past century phylloxera plague invaded Mallorca, and as in many other wineries all the vines had to be pulled up.

In 2005, the Ramis-Fornés family launched a new project with the oenologist Josep Lluis Pérez to plant ten hectares of vines and build a new winery equipped with the latest wine-making technology.

• Participation in the **World Environment Day campaign, June 5**

Every year, on June 5, the Xarxa de Hoteles Sostenibles de Baleares, in collaboration with the FEHM and the ACH, organizes a campaign to spread the World Environment Day among customers and the entire Balearic society.

In 2018 the United Nations motto for this day was the idea of raising awareness among the population in the urgent reduction of the production and excessive use of disposable plastics, which pollute our oceans, damage marine life and threaten human health.

The campaign consisted in presenting the theme of the Day through a poster facilitated by the XHSB, FEHM and ACH and awareness of the clients regarding such problem.

Previous years have also participated in the campaigns, according to the corresponding slogans proposed by the United Nations, and the campaigns organized by the XHSB.

• **Operation Kilo**

This is an initiative of the FEHM for the collection of dry food, with long-term expiration date in hotel establishments, to donate later to local NGOs, which are responsible for their distribution in soup kitchens or directly to families in need. Attached photo of the campaign of 2018, carried out as always at the end of the season, where the food was donated to the congregation of the Sisters of Charity.
