ENVIRONMENTAL, SOCIAL AND CULTURAL REPORTS

A sustainability indicator is any economic, social, political, or biological element that provides information about certain aspects of the natural world, environmental policies, or other related economic and social factors. **A sustainability indicator system enables us to make strategic, environmental, and social decisions and helps us to turn this information into action.**

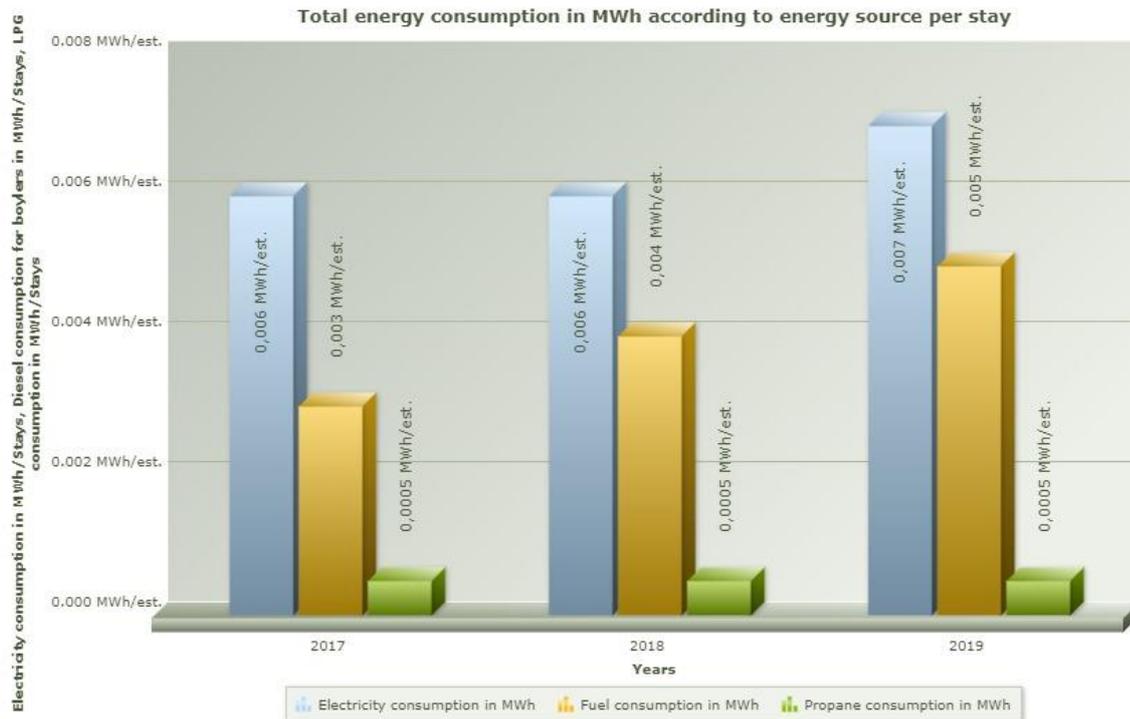

We use the tool Sustainablekeyindicators.com, based on the GRI (Global Report Initiative), the international guide more used for sustainable development and indicator guidelines.

The aim of this management is to evaluate sustainable behavior to provide us information in order to ascertain whether our organization has the ability to meet the established requirements, whether these be legal requirements or ones to which the Management or third parties must adhere (ISO 14001:2015 norms, Travelife System...)

Luckily, Menorca has preserved a number of typical products that have improved over the years. Whether in food, shoe store or at various local products and the market. Is essential to know them to understand because it is said that in Menorca we live very well.

variety of Minorcan cheeses. Although the name of origin it has the Queso Mahón Menorca, the natives of Minorca estimate so much or more the diverse cured cheeses and semis that can be found in the whole island. The Minorcan cheese is known for its salinity, but when one gets used to it the product it is formidable.

The bakeries of Ciutadella are undoubtedly the best on the island. There you will find from the most typical and traditional products to the latest innovations in the field. In the pastry shops we will find more than 100 traditional products that have been kept for tradition. The most popular are:
